Ekta Vihar, Sector 19, Zirakpur, Punjab – 140604

Professional Summary

Aspiring DevOps Engineer with a strong foundation in cloud computing, Linux administration, automation, server management, and CI/CD practices. Skilled in AWS, Docker, Kubernetes, Terraform, Ansible, Jenkins, Git, and GitHub. Focused on building scalable, reliable, and automated infrastructure through practical hands-on projects and continuous learning.

Education

Sardar Patel University Mandi
Bachelor's Degree

2025
CGPA: 7.38

Professional Training

DevOps Training - CS Soft Solutions

Current

Gaining hands-on experience with DevOps technologies, cloud platforms, CI/CD workflows, automation tools, and modern infrastructure practices in a professional company environment.

AI DevOps Course - Udemy

6-Month Program

Strengthening knowledge of automation, cloud platforms, DevOps tools, and AI-integrated workflows.

Technical Skills

Linux Administration	Linux commands, user management, SSH, networking, package management, server troubleshooting
Cloud Platform	AWS EC2, S3, IAM, VPC, CloudFront, Lambda, CloudWatch, cloud infrastructure basics
Containerization	Docker images, containers, Dockerfile, Docker Compose, port mapping, container deployment
Orchestration	Kubernetes Pods, Deployments, Services, Scaling, YAML manifests, orchestration fundamentals
CI/CD Automation	Jenkins pipelines, build automation, webhooks, GitHub integration, deployment automation
Version Control	Git commands, branching, pull requests, GitHub repositories, source code management
Infrastructure as Code	Terraform resource provisioning, variables, outputs, state management
Configuration Management	Ansible playbooks, inventory, automation tasks, server setup automation

Projects

AWS Static Website Hosting

Hosted a static website using Amazon S3 and CloudFront, with Terraform-based infrastructure setup for repeatable provisioning.

CI/CD Pipeline Automation

Built an automated build and deployment workflow using Jenkins, GitHub, and Docker to improve delivery speed and consistency.

File Upload Notification System

Created an AWS S3 upload notification workflow using Lambda, SNS, IAM, and CloudWatch for event-driven automation.

Core Strengths

- Strong interest in DevOps, cloud computing, automation, and infrastructure management.
- Hands-on learning approach with practical project implementation.
- Understanding of CI/CD pipelines, containerization, and infrastructure as code.
- Motivated to build scalable, secure, and reliable systems.

Career Objective

To grow as a skilled DevOps Engineer by applying cloud, automation, Linux, CI/CD, containerization, and infrastructure-as-code skills to real-world projects while continuously improving technical expertise.
